

How to run the MavPark project using PHP and MySQL

1. Download the project zip file
2. Extract the file and copy ase_final folder
3. Paste inside root directory (xampp - xampp/htdocs)
4. Open PHPMyAdmin (<http://localhost/phpmyadmin>)
5. Create a database with the name “test”
6. Import ((test.sql) file (given inside the zip package)
7. Run the script http://localhost/ase_final/home-page/test3.html
